SUMMARY

Motivated graduate with experience at Dell EMC in Python automation, testing, and data analysis. Skilled in Python, SQL, Excel, data cleaning, data visualization, and dashboard creation. Strong analytical and problem-solving skills with a focus on turning data into useful insights

EDUCATION

B.Tech in Electronics & communication Engineering,
Bhoj Reddy Engineering college for women , Hyderabad, CGPA: 7.5/10

2017- 2021

SKILLS

Languages:	Python,SQL
Web Technologies:	HTML, CSS, JavaScript, Bootstrap, Django
Databases:	Postgresql
Soft Skills :	Analytical Thinking, Problem-Solving, Critical Thinking, Communication.
Concepts:	OOPs, DBMS, SDLC, Agile,Computer Networks, Operating Systems
Tools:	VS Code, Excel, Git, GitHub, Jira, Docker, Grafana, PyCharm.

PROJECTS

1. Customer Sales Analysis Dashboard — Microsoft Excel

- Created an interactive sales dashboard using Pivot Tables, Pivot Charts, Slicers, and Excel formulas to analyze sales performance. Cleaned and analyzed sales data to identify trends, product performance, profitability, and business insights.

2.Employee Performance Analysis — SQL

- Analyzed employee data using SQL queries to identify department performance, salary trends, and employee statistics. Used SELECT, GROUP BY, JOIN, aggregate functions, and filtering techniques to generate analytical reports and insights.

3. E-Commerce Platform — Python, Django, MySQL, HTML, CSS, JavaScript

- Developed a web-based e-commerce application with frontend, backend, and database functionality. Implemented database operations and backend features using Python, Django, and MySQL.

WORK EXPERIENCE

Undergraduate Intern, DELL EMC

Feb 2022 – Feb2023

- Developed and deployed Python-based Lhotse automation scripts to automate repetitive tasks, reducing manual workload by approximately 30%.
- Developed and executed automated test scenarios using Python and Load Dynamix for the Isilon (PowerScale) product, covering functional, regression, and performance testing.
- Analyzed test results, reported defects, and supported debugging to improve product quality and reliability.
- Used Docker and MobaXterm to deploy and execute test scenarios and support system test automation activities.

CERTIFICATIONS

1. Data Analytics Course — AccioJob

June 2026 – Present

- Hands-on training in Excel, SQL, Python, data cleaning, data visualization, dashboard development, and analytical problem-solving using real-world datasets.

2. Python Full Stack Developer — Frontlines Edutech Private Limited (FLM)

May 2023 – Jan 2024

- Developed skills in Python, Django, database management, frontend technologies, and full-stack web application development.
